Professional Summary

Computer Science student (4.0 GPA) with hands-on experience in full-stack software development, cloud infrastructure, DevOps, CI/CD automation, and software testing. Currently supporting migration of an internal engineering platform from Atlassian tools to a self-hosted open-source stack on DigitalOcean. Proficient in Java, Python, SQL, React, Next.js, TypeScript, Docker, AWS, Supabase, Linux, and Agile methodologies.

Education

Arizona State University **Tempe, AZ**

Bachelor of Science in Computer Science; GPA: 3.99/4.0 Aug 2023 - May 2027

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Testing & Debugging, Operating Systems

Technical Skills

Programming Languages: Python, Java, C++, SQL, JavaScript, TypeScript, HTML, CSS
Frameworks & Technologies: React, Next.js, Tailwind CSS, REST APIs, Supabase, Docker, AWS Lambda, AWS RDS, DigitalOcean, GitHub Actions, Linux, Git
Tools & Platforms: Forgejo, OpenProject, XWiki, Jira, Confluence, Bamboo, Crucible, pytest, JUnit, NumPy, pandas, Matplotlib
Concepts: Full-Stack Development, Cloud Infrastructure, CI/CD Automation, Agile/Scrum, Software Testing, Version Control, API Integration, Database Design

Experience

Software Engineering Intern **June 2026 - Present**

NSV, Inc. Remote

- Migrated internal engineering toolchain from Jira, Confluence, Bamboo, and Crucible to a self-hosted open-source stack (Forgejo, OpenProject, XWiki) on DigitalOcean, supporting a team of 5 engineers
- Provisioned and configured 4 Ubuntu Linux servers and deployed Docker-based services, managing environment variables, network ports, storage volumes, and service-to-service connections
- Converted 7 CI/CD workflows from Bamboo to Forgejo Actions, automating build/test/deployment pipelines, and evaluated open-source tools against Atlassian functionality to document feature-parity gaps and migration requirements
- Tested migrated applications and analyzed application/container logs to troubleshoot integration issues, authoring deployment, maintenance, and recovery documentation for stakeholders

Library Aide III **March 2026 - Present**

Hayden Library, Arizona State University Tempe, AZ

- Supported front-desk operations for 1,000+ students and visitors daily, handling circulation, account assistance, equipment support, and inquiry resolution
- Audited and maintained circulation records using Excel and standardized validation workflows, improving data accuracy and record consistency

Library Aide **Aug 2025 - March 2026**

ASU Downtown Phoenix Library Phoenix, AZ

- Managed circulation services, patron inquiries, and overdue notices, reducing average wait times by 30% through workflow improvements
- Applied Excel data validation and conditional formatting to borrowing records, reducing data-entry errors by 40%

Projects

Anton-Cx | Next.js, TypeScript, Supabase, Claude API, D3.js **April 2026**

- Built a full-stack medical benefit drug-policy intelligence platform (React, Next.js, TypeScript, Tailwind CSS, Supabase, Vercel) with step-by-step and side-by-side comparison workflows
- Integrated AI-generated (Claude API) summaries and interactive D3.js visualizations, plus CSV/PDF export and a Dockerized local development environment

RecoveryOS | Next.js, TypeScript, Supabase, Clerk **April 2026**

- Co-developed an AI-enabled wellness platform using React, Next.js, TypeScript, Tailwind CSS, Supabase, Clerk, and Vercel
- Built the multi-page MVP interface and tested user flows, API behavior, and frontend-to-backend integration, identifying and resolving 3 application security concerns

ASU Global Career Accelerator | HTML, CSS, JavaScript, Git **Aug 2025 – Present**

- Delivered 2 responsive, mobile-first websites and an Intel-focused redesign project as part of a selective ASU career accelerator program, scoping requirements and building production-quality UIs
- Improved accessibility and performance using semantic HTML, ARIA, and WCAG standards across responsive assets; practiced professional Git workflows (issues, feature branches, PRs, code review)

Leadership & Achievements

- Competed in 3 ASU coding competitions and hackathons, collaborating in teams of 4 to design, build, test, and present functional software prototypes under tight deadlines
